

RMHS lead, ₹1400+ Cr Project, JSL		National Finalist- TECHgium (L&T)		Achieved global rank 9th, ASME HPVC	
Educational Qualification					
Qualification	Institute			CGPA/ %	Year
B.Tech (Mechanical)	Indian Institute of Engineering Science and Technology, Shibpur			8.93/10	2023
XII, CBSE	South Point High School, Kolkata			90.40	2018
X, WBBSE	South Point High School, Kolkata			89.14	2016
Work Experience					(35 Months)
JINDAL STAINLESS LIMITED, Jajpur, Odisha					(35 Months)
Associate Manager, SMS Carbon Steel					Jul '23-Jun '26
Roles and Responsibilities	• Spearheaded RMHS package, from planning through commissioning, in a ₹1400+ Crore BOF Project • Coordinated with 13+ vendors & contractors for procurement, supply, & timely equipment delivery • Led a team of 18 technicians & junior engineers for equipment installation & timely commissioning • Managed end-to-end billing & procurement of INR 1-2 Cr monthly, ensuring accuracy & compliance • Spearheaded milestone planning & progress tracking within a ₹1400+ Crore BOF Expansion Project • Collaborated with EPC contractors & cross-functional teams to resolve project bottlenecks & delays				
Key Learnings and Achievements	• Created a robust material-tracking system spanning spec mapping, code generation & inventory checks • Revived an RMHS package delayed by close to a year, propelling it ahead other cross-functional teams • Strengthened stakeholder management by close coordination with vendors & multiple internal teams • Cultivated leadership & delegation skills, later leading a 18-member technician & junior engineer team • Enhanced proficiency in SAP & Excel for end-to-end procurement, billing & documentation overall • Recognised by Sr management for notable contribution to efficient project planning & execution				
Academic Achievements					
Competitive	• Served as Team Lead, reaching the national finals of L&T TECHgium contest (5th Ed.) • Achieved Global Rank 9th and National Rank 3rd, in ASME HPVC 2020 (E-FEST)				2022 2020
Scholastic	• Published research titled 'Thermo-Economic Analysis of Cascade Refrigeration System'				2023
Projects and Internships					
Live Projects/Training					
Design Internship	• Designed complete 'Hydraulic Ladle Tilter' assembly from scratch using SolidWorks • Performed design validation, ensuring the structural integrity and operational feasibility				2022 (8 Weeks)
Research Project	• Researched evaporation & transport of respiratory droplets in varying ambient conditions • Analysed the effects of temperature, humidity, airflow, & viral load on droplet dispersion				2021 (10 Weeks)
Academic Projects					
Research Publication	• Developed a thermodynamic model for a Cascade Refrigeration System having low GWP • Analysed system performance utilizing thermodynamic & thermo-economic parameters • Evaluated optimal low-GWP refrigerant combinations for max efficiency & sustainability • Works published in ISHRAE Journal (2023) & presented at INCOM 2024 conference • Works published as a Springer Nature. chapter in "Advances in Energy & Sustainability				2019 (17 weeks)
Positions of Responsibility					
IEST Shibpur					
Team Lead, ASME Engineering contest	• Designed a Human Powered Vehicle from scratch for the HPVC competition by ASME • Coordinated design reviews and team feedback to finalize modelling & design changes • All this led my team to secure Global rank 9th & National Rank 3rd in the competition				2020-21
IEST, Shibpur					
Team Lead, L&T Engineering contest	• Led the design of an EGR-integrated Catalysed DPF, for use in modern vehicles • Coordinated the concept development, design reviews & technical documentation • Qualified as a Campus winners and overall National Finalists in the competition				2021-22
Additional Certifications					
Python: Basics to DS	• Learned Python fundamentals, OOP, & data structures through practice & exercises				2021
Extra-Curricular Activities					
Student member	• Led the revival of ISHRAE student chapter, & increased member participation by 30 %				2022-23
ASME Co-Secretary	• Served as Co-Secretary; led the weekly newsletter initiative of the ASME college society				2020-23
Interests					
Cooking	• Experimenting extensively with diverse recipes & cuisines as a creative hands-on culinary hobby pursuit				
Playing Badminton	• Playing badminton, and enjoying both the physical activity & fast-paced rallies of competitive matches				
Gaming	• Discovering new PC games while exploring different genres- particularly strategy and story-driven titles
